

The builder edit.

Shape the home through light, windows and surfaces.

LIGHTING / VISUAL COMFORT

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 52

WINDOWS / WOOD & WASHI

Wood & Washi / Photobook / PDF p. 24

SURFACES / TECNOGRAFICA

Tecnografica / Anthology 2026 / PDF p. 48

Six applications for builder selections, model homes and buyer design conversations. Complete room settings drawn from the available manufacturer and trade libraries.

Start with the space. Build a coordinated package.

A visual selection guide for builders and design teams, organized around the rooms that define a home.

01 / ENTRY + CIRCULATION

Arrival

A clear first impression.

Set fixture scale, ceiling clearance and switch locations against the entry and stair elevations.

04 / SLEEP + PERSONAL SPACE

Primary Suite

A calm finish with a clear purpose.

Separate fixed lighting from optional model-home lamps; coordinate bedside outlets and controls with the bed layout.

02 / THE DAILY GATHERING SPACE

Kitchen + Dining

Plan the light around the room.

Check the shade or panel path against faucets, counters, cabinet doors and window handles.

05 / PRIVATE RITUALS

Bath + Dressing

Give the detail room to work.

Review privacy, moisture exposure, mounting and cleaning with the window-treatment supplier.

03 / SHARED LIVING

Great Room

Light, glazing and surface in balance.

Choose a focal wall and confirm the graphic scale around windows, millwork and planned furniture.

06 / THE GARDEN CONNECTION

Indoor + Outdoor

Carry the expression to the threshold.

Keep these Tecnografica wallcovering references indoors. Use the botanical palette to connect the interior to the garden.

Choose the room direction first, then develop the fixture, window-treatment and surface schedules with the project team.

Arrival

A clear first impression.

A composed sequence of rooms

HVLG lighting shown along an interior arrival sequence.

Hudson Valley Lighting Group / HVLG Designer Lookbook / PDF p. 22

Give the entry and circulation spaces a deliberate identity. Pair a considered light with an architectural window treatment and a surface that carries the eye through the home.

LIGHTING

Set fixture scale, ceiling clearance and switch locations against the entry and stair elevations.

WINDOWS

Resolve mounting, trim and panel travel before the opening details are finalized.

SURFACES

Plot the mural on the actual wall, including stair slopes, doors and sightlines.

Carry the choices through.

A clear first impression.

Light through the hall

Visual Comfort ceiling lighting in a complete circulation setting.

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 42

Flow / architectural openings

Wood & Washi Flow shown at tall, shaped glazing. Confirm the system layout for each opening.

Wood & Washi / Photobook / PDF p. 29

Ottone Garden / the stair wall

Tecnografica wallcovering used as a continuous visual story around a stair.

Tecnografica / Anthology 2026 / PDF p. 18

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Kitchen + Dining

Plan the light around the room.

A coordinated kitchen lighting story

Visual Comfort pendants, accent lights and cabinetry shown together.

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 52

Connect the island, table and surrounding glazing as one composition. Select the lighting family and window treatment together, then use one wall to give the gathering space its character.

LIGHTING

Align fixture centers and drops with the final island and dining layout; coordinate the control schedule.

WINDOWS

Check the shade or panel path against faucets, counters, cabinet doors and window handles.

SURFACES

Identify the feature wall separately from cooking and splash zones; confirm the appropriate finish for each area.

Carry the choices through.

Plan the light around the room.

A softer island-lighting direction

HVLG lighting in a warm wood kitchen. Use the full room to compare scale and finish.

Hudson Valley Lighting Group / HVLG Designer Lookbook / PDF p. 3

Rollo combi / kitchen glazing

Wood & Washi Rollo combi shown across a kitchen window wall.

Wood & Washi / Photobook / PDF p. 15

Alberi Zen / the dining backdrop

Tecnografica wallcovering brings vertical rhythm to a complete dining setting.

Tecnografica / Anthology 2026 / PDF p. 11

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Great Room

Light, glazing and surface in balance.

Flow / the double-height room

Wood & Washi horizontal panels shown as part of the glazing architecture.

Wood & Washi / Photobook / PDF p. 24

Make the main living space feel complete before the furniture arrives. Use the glazing proportions, ceiling volume and a single focal wall to organize the finish package.

LIGHTING

Review fixture scale, ceiling height, viewing angles and dimmer compatibility with the lighting schedule.

WINDOWS

Coordinate panel divisions, stacking or travel space, mounting support and any proposed power or controls.

SURFACES

Choose a focal wall and confirm the graphic scale around windows, millwork and planned furniture.

Carry the choices through.

Light, glazing and surface in balance.

A sculptural living-room light

Visual Comfort lighting in a complete living room with generous glazing.

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 10

Yage / a quiet landscape wall

Tecnografica creates a tonal focal point behind the seating group.

Tecnografica / Anthology 2026 / PDF p. 48

Archetipo / architectural restraint

A quieter Tecnografica surface direction for an open living plan.

Tecnografica / Anthology 2026 / PDF p. 55

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Primary Suite

A calm finish with a clear purpose.

Flow / the bedroom wall

Wood & Washi panels shown with a bed and integrated bedside composition.

Wood & Washi / Photobook / PDF p. 34

Coordinate the bedroom, its windows and an adjoining personal work area. Keep the large surfaces calm and use the lighting plan to support the way the room will be lived in.

LIGHTING

Separate fixed lighting from optional model-home lamps; coordinate bedside outlets and controls with the bed layout.

WINDOWS

Define privacy and room-darkening goals, then request suitable material and system options for the exact opening.

SURFACES

Set the headboard-wall composition using actual bed height, outlets, switches and adjoining trim.

Carry the choices through.

A calm finish with a clear purpose.

The bedside finishing layer

Visual Comfort lamp in a furnished bedroom. A model-home or buyer finishing option, separate from fixed lighting.

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 20

Hinode / a restful focal wall

Tecnografica wallcovering shown behind a complete bedroom group.

Tecnografica / Anthology 2026 / PDF p. 29

Flow / the personal work zone

Wood & Washi window panels coordinate the light and view around a desk.

Wood & Washi / Photobook / PDF p. 35

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Bath + Dressing

Give the detail room to work.

Marea / the bath as a complete room

Tecnografica surface imagery frames a freestanding-bath setting. The scene does not identify the installed substrate.

Tecnografica / Anthology 2026 / PDF p. 31

Bring the same design attention to the bath and dressing areas. Consider the mirror, decorative light, window privacy and selected wall finish as a coordinated group.

LIGHTING

Confirm the exact fixture rating and installation requirements for its location; coordinate mirror and vanity dimensions.

WINDOWS

Review privacy, moisture exposure, mounting and cleaning with the window-treatment supplier.

SURFACES

Select and approve the complete wallcovering system for the exposure. Tecnografica offers H2O fiberglass for humid and wet-area applications.

Carry the choices through.

Give the detail room to work.

Vanity and ceiling light, together

Visual Comfort lighting in a full bathroom setting, with mirror and cabinet relationships visible.

Visual Comfort & Co. / Spring Lookbook · 2026 / PDF p. 40

Flow / privacy at the bath window

Wood & Washi Flow shown in a bathroom context; confirm suitability for the planned exposure.

Wood & Washi / Photobook / PDF p. 33

Delicate / a decorative vanity wall

Tecnografica wallcovering shown with a vanity and mirror. Specify the finish separately from the graphic.

Tecnografica / Anthology 2026 / PDF p. 21

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Indoor + Outdoor

Carry the expression to the threshold.

Light for the covered lounge

Troy / HVLG exterior lighting shown within a complete outdoor seating arrangement.

Hudson Valley Lighting Group / HVLG Exterior Lookbook / PDF p. 14

Connect the covered outdoor room to the spaces inside. Coordinate exterior lighting with interior window and wall treatments so the transition feels intentional.

LIGHTING

Select each exterior fixture for the actual exposure and confirm its rating, mounting and electrical requirements.

WINDOWS

Use the interior glazing treatment to frame the view; resolve door movement and panel clearance.

SURFACES

Keep these Tecnografica wallcovering references indoors. Use the botanical palette to connect the interior to the garden.

Carry the choices through.

Carry the expression to the threshold.

A dining setting after dusk

Troy / HVLG lighting gives an outdoor dining group a focal point.

Hudson Valley Lighting Group / HVLG Exterior Lookbook / PDF p. 1

Rollo / the view-facing dining room

Wood & Washi window treatments shown inside, framing the landscape beyond.

Wood & Washi / Photobook / PDF p. 10

Morgan / the interior garden connection

Tecnografica botanical wallcovering for the adjoining interior. This is not an exterior material specification.

Tecnografica / Anthology 2026 / PDF p. 36

Keep the room composition in view while choosing the referenced category. A visual pairing does not establish a complete product specification.

Turn the look into a builder package.

A practical sequence for moving from room imagery to a coordinated selection schedule.

01 / CHOOSE

Choose the spaces, visual references and lead finishes. Identify the standard selection and any buyer options.

02 / COORDINATE

Use the current floor plan and elevations to coordinate fixture centers, outlets, window mounting, trim, controls and wall layouts.

03 / CONFIRM

Request current samples, dimensions, product documents, pricing and lead times. Resolve exact finishes and exposure requirements.

04 / RELEASE

Record approved items, responsible suppliers and installers, quantities and delivery milestones in the project schedule.

For an ICF home, coordinate attachment, service routes and window details with the project design and construction team before interior finishes are released.

The references behind the edit.

Use the linked captions to return to each original book. PDF page numbers count from the first page of the file.

Lighting documents

Check the exact fixture specification, installation guide and dimmer compatibility before final selection.

[Open manufacturer reference](#)

HVLG libraries

Return to the manufacturer books and selected product records for current details.

[Open manufacturer reference](#)

Wood & Washi mounting

Flow offers wall or ceiling mounting and optional powered operation. Confirm the selected configuration, power supply and controls for the project.

[Open manufacturer reference](#)

Tecnografica H2O

H2O is a fiberglass wallcovering finish for humid and wet-area applications. Confirm the complete specified system and installation requirements; a room photograph does not establish the substrate.

[Open manufacturer reference](#)

Manufacturer room photography and renderings are visual references, not completed EverSafe Homes installations. Each caption identifies the lighting, window treatment or surface being referenced; other furnishings provide context. Availability, account access, pricing, dimensions, lead times and project suitability are confirmed during specification.
